

EVF G2 Dual 15" subwoofer

- New EV transducers and low-loss crossover, next-gen low latency FIR presets
- Indoor and outdoor (FW) options available
- Removable Euroblock connections and built-in NL4-connection, and new mounting option for full-range models
- Updated grille design withstands high-SPLs while wet, and is fully front-serviceable

Introducing the long-anticipated second-generation of EVF loudspeaker from Electro-Voice. EV's most versatile point-source lines for short to medium-throw applications launched in 2008 is now updated to perform even better in all point-source projects.

From mid-sized stadiums, performing arts spaces, and theaters, to high-SPL music venues or houses of worship, EVF G2 has been fully redesigned with modern components and processing to elevate the quality of an installation at a better value than ever before.

While EVF G2 inherit external dimensions from its 1st-generation equivalent, every other aspect has been redesigned from scratch for better performance. Completely new in-house EV transducers, low-loss crossovers, EV's highest performance HF horns ever, flat-phase FIR presets with <10ms of system latency, new ergonomic wiring input panels, and so on.

Every detail of each model has been carefully considered to deliver not just a light refresh but a reimagining of how much performance is possible from a two-way loudspeaker at this price class.

EVF-215S G2 is an upgraded version of the previous generation subwoofer, including all-new EV drivers and a low-frequency extension that goes down to 32 Hz. Provided in black and white colors, EVF-215S G2 offers four dual 15-inch subwoofers certified to IP55. This water and dust protection is valid with the moisture resistant cover installed and a minimum 5° down tilt. Fully weatherized models are also able to handle full exposure to the elements, including high salt marine environments.

The new single-step polyurea paint provides a consistent, higher performance exterior across multiple product families. The brand new white paint offers reliable UV performance and bright RAL9003 color.

Suspension options include eyebolts and rigging kits. Four Omni-mount points on the rear of the enclosure also provide on-cabinet mounting option for compatible accessories.

Technical specifications

Frequency response (-3 dB) ¹	38 Hz - 100 Hz
Frequency range (-10 dB) ¹	32 Hz - 140 Hz
AES75 Linear SPL ²	126 dB
AES75 Peak SPL ²	137 dB
Nominal coverage	360°
Power handling (continuous)	800 W
Power handling (program)	1600 W
Peak input voltage	130 V
Nominal impedance ³	4 Ω
Nominal impedance ⁴	8 Ω
Minimum impedance ³	3.4 Ω
Minimum impedance ⁴	6.8 Ω
Preset high-pass	32 Hz
Connector type	10 AWG Euroblock NL4
Suspension points	(28) M10 rigging points
IP rating ⁵	IP55
Operating temperature	-20°C - +50°C
Storage temperature	-40°C - +60°C
Color	Black (RAL9005) White (RAL9003)
Dimensions (H x W x D)	30.3 in x 26.5 in x 28.6 in
Dimensions (H x W x D)	769 mm x 674 mm x 726 mm
Weight	152 lb
Weight	69 kg
Shipping weight	92.5 kg
Shipping weight	203.5 lb
Included hardware	Dual gland nut cover plate

¹ 100 Hz preset, measured in full-space (4π)

² Half space, measured per AES75-2023

³ Parallel

⁴ Dual

⁵ Only FW models in outdoor, wet, or salty environments
