

SP22

Sound Projector

AUDAC

► Features

- Clear and intelligible
- Weatherproof
- High efficiency
- Suitable for in- and outdoor
- Aluminium constructed
- Moving bracket
- IP56

► Applications

- Shopping streets
- Factory halls
- Amusement parks
- Playgrounds
- Parkings

The SP22 is AUDAC's professional humidity and weatherproof unidirectional sound projector with a high efficiency level.

It features a 5" full range driver and built-in 100V line transformer with several power tapings. The power of the speaker can be adjusted in three steps of impedance: 20W, 10W and 5W, by connecting the corresponding pair of the 4 core connection cable.

The design of the speaker makes it perfect to use in a wide variation of in- and outdoor applications, ranging from small to large projects where good speech intelligibility and background music are necessary.

It can be mounted on walls and ceilings, and can be positioned to the right angle with it's bracket. The focussed radiation of the speaker allows mounting on normal ceiling height, but can also be mounted high up.

The speakers enclosure, grill and bracket are made of aluminium, what makes it suitable for use in humidity conditions as well in- or outside.

Only available in white.

► Specifications

SYSTEM SPECIFICATIONS	
Rated power	20 W
Frequency response	110 Hz - 15 kHz
Sensitivity	93 ± 3dB
Line transformer power tapings	20 W / 500 Ohm
	10 W / 1 KOhm
	5 W / 2 KOhm
PRODUCT FEATURES	
Dimensions	Ø 138 x 205 mm
Weight net	2.2 Kg
Drivers	1 x 5"
Construction	Aluminium
Front finish	Aluminium grill
Colour	White
Projector way	1
Connection cable	3 meter
SHIPPING & ORDERING	
Packaging	Carton box
Shipping weight & volume	3 Kg - 0.0094 Cbm
